

## ZANA LINE - NOVELTIES !

THERMIC, Belgian's top manufacturer of designer radiators, is well known for its innovative heat technology, trend-setting product design and impeccable quality.

*As a trendsetter in the field of designer radiators* Thermic proudly presents the latest novelties in its successful ZANA-range.

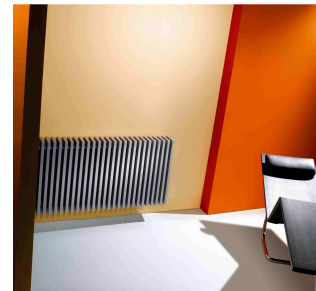

ZANA-line creates a harmonious rhythm of rectangular tubes, radiating tight design in combination with a high heat output. This unique concept offers an extensive and versatile range of designer radiators, suitable for kitchen, bathroom, living room, hall areas and commercial projects.

*Zana-Line is awarded the prestigious Fnas d'Or-Award 2006 !*

### ZANA-MULTI

ZANA-MULTI is today's alternative to traditional horizontal tube or column radiators. This radiator stands out with its eye-catching vertical L-shaped tube configuration at the top and the limited distance between the tubes ensures a very high heat output ! The Multi is available in a single and double design (Multi 1, Multi 2), in 3 heights (550, 650, 750mm) and in various lengths (from 10 to 74 tubes).

*Zana-Multi is awarded the prestigious **DESIGN PLUS** at ISH Frankfurt 2005 and the Red Dot-Award !*

### ZANA-LIBRA

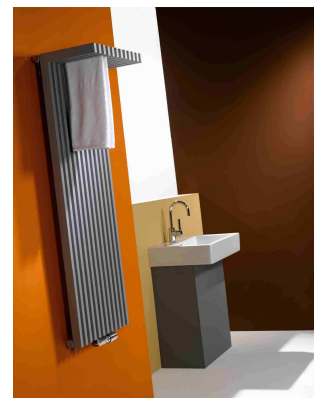

ZANA-LIBRA is a revolutionary (bathroom)-radiator that stands out with its rigid rectangular tube configuration and L-shaped tubes.

The vertical version offers the possibility of drying or stacking towels, whereas the horizontal version is designed primarily as a corner-piece above the bath or in another room.

Zana-Libra adds extra aesthetic value to every interior!

The Libra is available in 3 heights (900, 1400, 1800mm) and in 3 lengths (10, 12, 14 tubes) :

- Zana LU: vertical version, angle at top ("up")
- Zana LD: vertical version, angle at bottom ("down")
- Zana LL/LR: horizontal version, angle "left/right"

**ZANA-LU**

*Zana-Libra is awarded the prestigious Red Dot Award and the IF Product Design Award 2007 !*

### ZANA-PLINT

ZANA-PLINT is a low compact heating element that is best placed in front of large sections of window. The perforated grille connects the 2 rows of horizontal rectangular tubes into one whole. The Zana Plint is available from March 2006 in only 1 height (254mm) and various lengths (from 1000 to 3000 mm) with designer feet.
